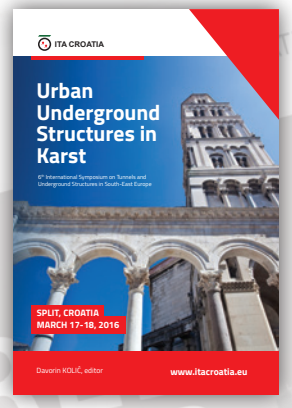
Tunnels 2

2016. 132 pages
ISBN: 978-953-55728-8-6

The book consists of 4 guidelines of ITA-AITES working groups: WG3 Contractual practices, WG12 Sprayed concrete, WG15 Underground works and environment and WG17 Long tunnels at great depth. The book is issued as a bilingual book (Croatian/English) for the use on the market in South-East Europe SEE.

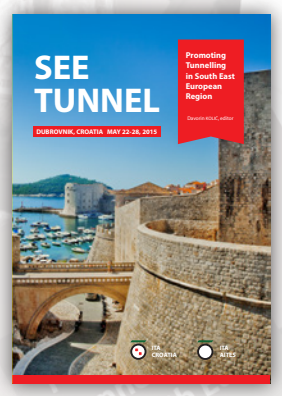


Davorin Kolić, editor

Urban Underground Structures in Karst

2016. 180 pages
ISBN: 978-953-58909-0-4
300kn/40€

Proceedings of 6th International congress on tunnels and underground structures in South-East Europe, Split, March 17-18, 2016. Printed book includes articles about recent applications of tunnelling methods and technologies mostly in urban areas in geological formations with karstic phenomena that is very often to be met in the region of SEE. Presented articles are grouped in 5 chapters: 1. Underground road traffic, 2. Underground rail traffic, 3. Construction in underground water, 4. Sewer rehabilitation and construction methods and 5. Underground urbanism.



Davorin Kolić, editor

SEE Tunnel

Promoting Tunnelling in SEE region
2015. 830 pages, 4 GB USB stick
ISBN: 978-953-55728-5-5
750kn/100€

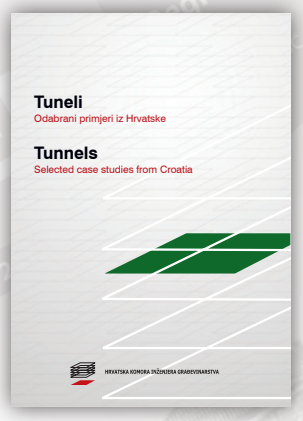
Proceedings of 41st World Tunnel Congress of ITA -AITES, Dubrovnik, May 22-28, 2015. The book includes short versions on 2 pages of all 390 accepted articles for publishing and 4GB USB stick is having the .pdf form of all articles in a full size. Published articles are grouped in 13 chapters and printed with colour photos and drawings. Themes are covering most of important topics and international projects presenting recent state-of-the-art in tunnelling and underground construction works worldwide.

Davorin Kolić, editor

Zagreb Underground

2014. 254 pages
ISBN: 978-953-55728-8-6
300kn/40€

Proceedings of Symposium on underground solutions in cities in SEE, Zagreb, March 27-28, 2014. Themes presented in this book could be used in any other country of the SEE region and solutions for them are based on international practice. All articles have been chosen and approved for the publication by two main reasons that established two main theme groups: Local needs and international experience & Methods and technologies.



Davorin Kolić, Zvonimir Deković, editors

Tunnels

Selected case studies from Croatia,
2013. 300 pages
ISBN: 978-953-55728-4-8
300kn/40€

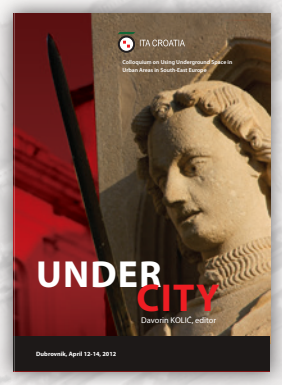
The book was prepared as a professional literary unit from the area of tunnelling aiming to fill a gap in the scanty indigenous market of professional literature. With a clear, concise, and down-to-earth book providing a wealth of knowledge, information and results of practical applications in use of underground space in Croatia.

Davorin Kolić, editor

Tunnelling in Mediterranean Region

2013. 445 pages
ISBN: 978-953-55728-9-3
300kn/40€

Proceedings of Symposium on tunneling in Mediterranean region, Poreč, May 7-8, 2013. The character of submitted articles has defined major area of interest or experiences gained on different sites worldwide that may be used in the region. The focus is on similarities of Mediterranean region to the region of SEE as well as intention of using underground more in the future.

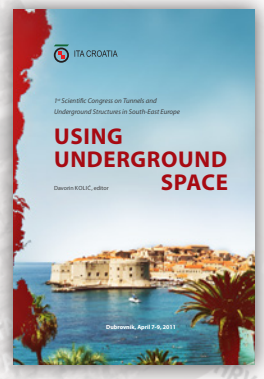


Davorin Kolić, editor

Under City

2012. 160 pages, 2 GB USB stick
ISBN: 978-953-55728-7-9
300kn/40€

Proceedings of Colloquium on using underground space in urban areas in SEE, Dubrovnik, April 12-14, 2012. The topics present different problems in urban areas from different points of view offering solutions and new technologies. The entire event body consist of 4 sessions on specific themes with invited speakers and other 6 topics on regular underground applications in urban areas.



Davorin Kolić, editor

Using Underground Space

2011. 240 pages, 2GB USB stick
ISBN: 978-953-55728-6-2
300kn/40€

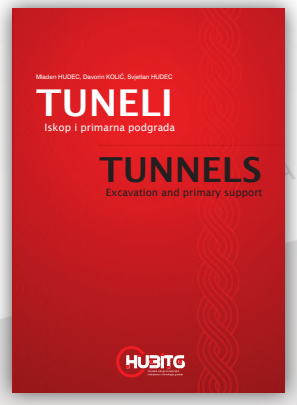
Proceedings of 1st Scientific symposium on tunnels and underground structures in SEE, Dubrovnik, April 7-9, 2011. This book points out the importance of using underground space in order to improve the quality of daily life. The focus is on construction projects and plans in the future. The main goal is to spread the ideas and knowledge about tunnelling wider in the region.

ITA AITES Guidelines, WG5 & WG19

Tunnels

Guidelines for good occupational health and safety practice in tunnel construction. General report on conventional tunnelling method, 2010. 175 pages
ISBN: 978-953-55728-2-4

The guidelines are intended to provide guidance on basic good practice in tunnelling works where none exists. The WG5 has collected details of publications relevant to health and safety in tunnelling from different countries.
Bilingual published: Croatian/English.



Mladen Hudec, Davorin Kolić, Svjetlan Hudec

Tunnels

Excavation and primary support, 2009. 206 pages
ISBN: 978-953-55728-1-7
380kn/50€

The basic structure of the book starting with the review of the evolution of underground construction methodology through history concentrates in the main body of the text on the analysis of the principal issues relevant for the tunnels constructed by conventional excavation methods.
Bilingual published: Croatian/English.
